

Custom-Built Enclosures

Built to Client Specifications *or*
Designed by JCSI Professionals

J Custom Supply, Inc. can help design and build any enclosure your project requires. We use a variety of materials depending on the demands of the project. Standard Hoffman enclosures are often used for normal duty. For harsher environments and saltwater exposure we recommend NEMA 3R custom-built Stainless Steel enclosures. Contact us with your specifications for design assistance.

Stainless Steel

Designed for DC application: These Stainless Steel boxes are used by a large research laboratory and were built to customer specifications using the larger Cam-Lok E1017 series connectors. Caps and lanyards were added for protection from dust and other contaminants. Dimensions of each box are 24" x 24" x 15".

Stainless Steel

This box is a popular design for a variety of applications. It consists of a 6" x 6" x 18" Stainless Steel trough with a removable front cover. It utilizes four E1016 Cam-Lok female receptacles with NEMA 3R covers.

Stainless Steel

Designed for a generator application: Two Hubbell 20 amp Duplex Receptacles protected by 20 amp Square D Breakers. Two Hubbell 2616, 2 pole, 3 wire, 30 amp female receptacles with 30 amp single pole Square D Breakers. Hubbell 2716, 3 pole, 4 wire, 125/250 volt flanged receptacle, protected by 2 pole, 30 amp, Square D Breaker. One Hubbell 50 amp, 3 pole, 4 wire, female receptacle with a 2 pole, 50 amp Square D Breaker. Enclosure is stainless steel with a lid that hinges up and has a hasp and staple for padlocking.

Custom-Built Enclosures

This box is a popular design for a variety of applications. It consists of a 8" x 8" x 24" Hoffman NEMA 3R trough with a removable front cover. This assembly utilizes five E1016 Cam-Lok, female panel mount receptacles with NEMA 3R covers. Available with these variations:

T1: Double set-screw, female panel mount receptacles

T2: ½" Stud, female panel mount receptacles

T3: Single-phase, Double set-screw, female panel mount receptacles

T4: ½" Stud, female panel mount receptacles

This enclosure is a 30" x 30" x 16" Hoffman NEMA 3R box. Mounted on the interior panel are five male E1016, ½" stud, Cam-Loks. Color coded for 480 volts: Green, White, Brown, Orange, and Yellow. These are connected with a 3" galvanized nipple, to 200 amp, 480 volt, NEMA 3R fused disconnects. This assembly comes with a neutral ground connection and is wired and ready to be installed.

Transfer Switch

This is a JCSI Transfer Switch. The lower panel opens to reveal Cam-Lok connectors for attaching power cables from a gen-set. The switches, interconnect cabinet, and custom power cables are all available from JCSI in single or three phase, 120 volt, 240 volt, or 480 volt configurations. Comes with cables and connectors rated for 150 amps to 1100 amps. Pre-wired and ready to install.
