

Portable Power Distribution Centers

- OSHA and Code Compliant
- Reduce Power Tool Burnout
- Rated 50 Amps at 240 Volts
- GFI Protected Circuits
- Protected by Strong Steel Guard
- Rugged and Reliable for Field Use
- Protection from Open Neutrals And Reverse Phasing

The "G" Series Portable Power Distribution Centers have been engineered utilizing the latest in GFCI technology, providing the user with the highest level of electrical safety and protecting against open neutral and reverse phasing. They are U.L. Listed for outdoor use and designed to stand up to the toughest jobsite conditions while providing the ultimate in electrical safety.

The distribution box breaks the current down into six, 20 amp 120 volt, individual GFCI protected circuits. In addition, it offers the user one 30 amp 250 volt and one 50 amp 125/250 volt output. The 50 amp 125/250 volt output allows the box to be run in a series with other boxes. A 50 amp 125/250 volt power outlet receptacle is required at the main pole or generator. From this outlet, you run 6 gauge power cord to the box. Additional boxes may be strung together using the 50 Amp output as a feed through receptacle. 50 Amp Power cords are available in 50' and 100' lengths.

Specifications

Input current: 50 amp 1 phase 125/250 volt A.C. 3 pole 4 wire. Trip Level: 4-6 milliamps. Trip Time: Less than .025 seconds nominal. Chassis: 16 gauge steel. Top: 14 gauge steel. Legs: 10 gauge steel. Finish: 3 mils U.L. listed polyester powder coat.

Dimensions

Width: 14.5", Length: 21" Height: 11".

Model 8706G With Turn-Lock L5-20R Receptacles

Outputs: (1) CS6369 50 AMP 125/250 Volt receptacle
(1) L6-30R - 30 Amp 250 Volt non-GFCI receptacle
(6) L5-20R Amp Twist-lock 125 Volt GFCI individually protected receptacles

Model 8706GU With Straight Blade 20A 125V Receptacles

Outputs: (1) CS6369 50 AMP 125/250 Volt receptacle
(1) L6-30R - 30 Amp 250 Volt non-GFCI receptacle
(6) 5-20R Amp Straight Blade 125 Volt GFCI individually protected receptacles
